CeraVent safety data sheet or SDS / Sicherheitsdatenblatt

Dear Mr. Rovacchi,

you were asking for a so called Sicherheitsdatenblatt (safety data sheet or SDS) for our CeraVent System. It is intended to provide workers and emergency personnel with procedures for handling or working with that substance in a safe manner, and includes information such as physical data (melting point, boiling point, flash point, etc.), toxicity, health effects, first aid, reactivity, storage, disposal, protective equipment, and spill-handling procedures. SDSs are a widely used system for cataloging information on chemicals, chemical compounds, and chemical mixtures. SDS information may include instructions for the safe use and potential hazards associated with a particular material or product. These data sheets can be found anywhere where chemicals are being used.

Since the components we sell with the CeraVent system (the mat, the dowels and the mesh) do not belong to the above mentioned group of products, we do not have a SDS. Of course, the associated products as adhesives, grouts etc. may need SDS's. You can get them from the building chemicals supplier.

Best regards

GUTJAHR
Systemtechnik GmbH

Ralph Johann
